Informing me that these Machines were an infringement upon Letters Patent which they owned, and that suits would be instituted against me, unless I should otherwise settle with them. This notice I handed to Mr. Wooster, nue of my employers'

I then made investigations to ascertain the facts, and found that said Machine, as I believed, was an infringe-ment of said Patent, and I informed said Watson that such Sobsequently a suit was commenced against me by said Potter and Wheeler, and immediately thereafter I so in-formed Mr. Watson, and requested him to take charge of

the defence of the same, and he refused to do so, and I then told him that I would have nothing more to do with it, and I then coused to make the Machines; and the in-Junet on, a copy of which is hereto annuraci, was issued and served upon me. PATENT ELASTIC FIRE & WATER-PROOF CEMENT ROOFING.

THE undersigned are prepared to introduce into use in Tennessee W. E. CHILDS & CO.'S PATENT ELASTIC FIRE AND WATER-PROOF CEMENT ROOFING, and ask the attention of Architects, Builders, Railroad Companies, and the public to examine its superiority over other

ARCHITECTS AND BUILDERS should not fall to examine this Roofing, as it is better and cheaper than any thing in use. The material forms a hard and smooth sur-face that will resist the action of the atmosphere in every climate. It is impervious to water, elastic, and flexible. t contracts and expands with the changes of the atmos re, and will neither evaporate, crack nor rot; and, as to Its durability, there is no question.

It is practically imperishable, and will perfectfully resist any ordinary external exposure to fire, as is abundantly proved, and we will warrant it water-proof. We will en-

gage to put our Roofing on over ordinary good heathing, old shingles, tar and gravel, tin, zinc, copper, or iron roofs—it making no difference how steep or flat they may be—for seven dollars per one hundred square feet, it being far cheaper than any Roof of the old style, and we are sure it t will also be found to be the best thing ever invented to cover or mend old leaky tin, tar and gravel roofs, or around chimneys, scuttles, dormar windows, and gutters, where the tin is rusted through. This Cement can be put on to last as long as stone, and form a perfect adhesion to any object to which it is applied. The Roofs can be painted over (and warranted not to leak) at two d llars and fifty cents per handred square feet, which is cheaper and much bet-ter than paint. This Roofing will be found to be the best theng for covering large doofs where they are exposed to fir — such as Steam Mills, Saw Mills, Factories, Raifroad Cars, Bridges, Depots, Station Houses, Steamboat Decks, and, is fact, every kind of Roof where there is an external exposure from fire. As the Roof is perfect, without a joint it, it presents no chance for fire to communicate, and any ight substance will burn out without igniting.

This insurance Offices at Cincinnati, and other places where Childs & Co.'s Cement has been used, insure Build-

ngs with Roofs covered with this Cement, at the same rates as for those covered with Iron, Copper or Tin. The Cement will be furnished to those at a distance ith directions for using.

Orders sent to the undersigned, through the Postoffice, will be promptly attended to J. T. NATHURST, No. 24, Spruce Street.

TO ALL WHOM IT MAY CONCERN: This is to certify that have examined specimens and Roofs of W. E. Childs & Co.'s "Elastic Fire and Water-Proof Coment Roofing," and be leve it to be eminently superior to any other kind of Root ing in use. Having made considerable inquiry as to the merits of the
'Patent Elastic Cement soofing," introduced into this city
by Childs & Co., I find it to be highly recommended in this city by many excellent judges; that it is meeting with very ready and general introduction; that its superiority over the tar composition Roofing is decided and freely admitted; and finally, I expect to adopt it for my next roof, which will be next summer—having intended to use tin, but will try the virtues of the "Patent Elastic Roofing" as a substitute. This is a purely vegetable compound, prepared on stricty scientific principles, after the manner of the celebrated foliand Professor, Boerhave. Because of its great success in most of the European States, its introduction into the United States was intended more especially for those of our fatherland scattered here and there over the face of this L. B. & T. D. FITE. fatherland scattered here and there over the face of this mighty country. Meeting with great success among them, I now offer it to the Amedican public, knowing that its truly wonderful medicinal virtues must be schnowledged. It is particularly recommended to those persons whose constitutions may have been impaired by the continuouse of ardent spirits, or other forms of dissipation. Go erally instantaneous in effect, it finds its way directly to the seat of life, thrilling and quicksning every nerve, ralsing up the drooping spirit, and, in fact, influsing now health and vigor in the system.
